Emergency Response

Whiting Crude Oil Release, Whiting, CA: Terrence provided technical support to Region 5 OSC Mike Beslow and British Petroleum (BP) personnel in developing a methodology for estimating the volume of crude in solid waste for the Whiting Crude Oil Release emergency response. Terrence also participated in conference calls to review the estimation of total crude released.

On March 24, 2014, crude oil was released from British Petroleum pipeline to Lake Michigan in Whiting, IL. Region 5 has responded to the spill and is overseeing the cleanup by BP and its contractors.

Project Status: Completed

Regional Financial Commitment: None
